Description of the violation according to the international humanitarian law:

Legal Center made field visit to the targeted position and found it a civil place has no military presence. It is known that targeting civilians is a crime that the international law set punishment for and is a breach for the principles and values that were established and agreed by the civilized societies. The continuing of targeting and killing children, women and civilians by the Saudi-led coalition and its allies is a crime of many that still committing before the international society who is still dam and deaf to these crimes. This will stand as a stone in front of the collaboration of the international society and its aims of preserving and protecting the rights and freedoms that will be an international precedent of aggression against the states and societies.

Center Recommendations:

- Legal Center for Rights and Development calls on all civil society organizations and international organizations, especially United Nations organizations, to shoulder their moral and humanitarian responsibilities towards the crimes committed by the Saudi regime and its coalition against humanity and humanity.
