About REACH Initiative

REACH facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. All REACH activities are conducted through inter-agency aid coordination mechanisms.

For more information, you can write to our in-country office: yemen@reach-initiative.org. You can view all our reports, maps and factsheets on our resource centre: reachresourcecentre.info, visit our website at reach-initiative.org, and follow us [@REACH_info](https://twitter.com/REACH_info).

Introduction

The IDP Hosting Site Baseline Assessment aims to support targeting and response planning by humanitarian stakeholders, including authorities, UN agencies, and local and international non-governmental organisations (NGOs). It provides a baseline of key multi-sectoral indicators across IDP hosting sites in 20 governorates, based on data collected through interviews with key informants in each site. The baseline assessment will help to inform the site management support which will be offered to the local authorities and humanitarian actors in charge of IDP hosting sites, as well as the support which will be offered to IDPs to establish self-governance, community participation, and communication processes within IDP hosting sites.

The IDP Hosting Site Baseline Assessment is organised and supported by the Shelter / NFI / CCCM Cluster coordination team and cluster partners. The data collection for the baseline assessment was carried out by the International Organisation for Migration (IOM) in 16 governorates and the office of the United Nations High Commissioner for Refugees (UNHCR) in 4 governorates.

Once the baseline of current sites is finalised, its updates will be carried out every six months to assess newly established sites. Monitoring of the sites identified through the baseline and its updates will also be carried out on a regular basis. The information generated over time through monitoring data collection will provide an indication of structural and sectoral changes in the conditions of the sites.

For the purposes of this assessment, REACH supports the Shelter / NFI / CCCM Cluster in data analysis and output production. The core outputs for this assessment include:

1. Summary report: Overview of key indicators and comparative analysis of sites to identify those in most urgent need;
2. Site Profiles: Produced for each site with relevant sectoral information;
3. Site Maps: Maps showing site location and characteristics.

This report presents findings from four governorates - Al Hudaydah, Al Mahwit, Hajjah, and Sana'a - based on data collected in July 2018 by IOM during the fourth phase of the baseline assessment. The first three phases of data collection took place in sixteen governorates, in June 2017, August 2017 and September/October 2017.

Methodology

The assessment was conducted in four stages across 20 governorates, in IDP hosting sites of five or more IDP households, where assistance and protection services can be delivered collectively. To identify sites, TFPM Area Assessments¹ and a Cluster site list have been used. Enumerators visited each site included on the Cluster Site List, and included the site in the assessment if it was found to meet the criteria of having five or more IDP families living there. The assessment covers both rural and urban settings and aims to assess every IDP hosting site in Yemen. However, new sites are being identified periodically, while some sites may no longer be present. Therefore, findings refer to identified sites, with new sites being added into or removed from later data collection rounds.

Data was collected through interviews with one to five key informants in each site. Key informants included site managers, members of site committee, sheikhs, mosque imams, community leaders, or in the absence of any formal leaders – randomly chosen IDP households, who responded on behalf of all households in the site. Consequently, findings reflect the informed perspectives of these key informants and should be considered indicative only.

1. [The Task Force for Population Movement \(TFPM\)](#), co-led by IOM and UNHCR is a Technical Working Group of the Yemen Protection Cluster. The TFPM implements an information management tool that gathers data on the status and location of displaced persons across Yemen.

Definitions

For the purpose of data collection, the Yemen Shelter / NFI / CCCM Cluster identifies each concentration of displaced population according to the following categories:

- **Location:** a populated place is the smallest geographical division: a neighbourhood in urban area and a village in rural area.
- **Site:** a location inhabited by five or more households regardless of its accommodation and shelter type. In cases of multiple housing units hosting five or more households each, having the same shelter type and sharing one basic service unit, a single data collection form shall be applied. Basic service units include latrines, water points or cooking facilities.
- **Individual settlement:** a population concentration hosting less than five households within one location (see above). Individual settlements are not included in this exercise.

Displacement sites are divided into two categories:

- **Collective Centre:** a displacement site in a pre-existing physical structure, either public/communal (e.g. public buildings, schools) or private buildings (e.g. factories, private houses) inhabited by five or more IDP households;
- **Spontaneous Settlement:** groups of tented or other types of housing units inhabited by five or more IDP households established by the IDPs themselves or by non-experienced actors on land they have no legal claim to. The IDPs intend to stay in this settlement for an extended period of time.

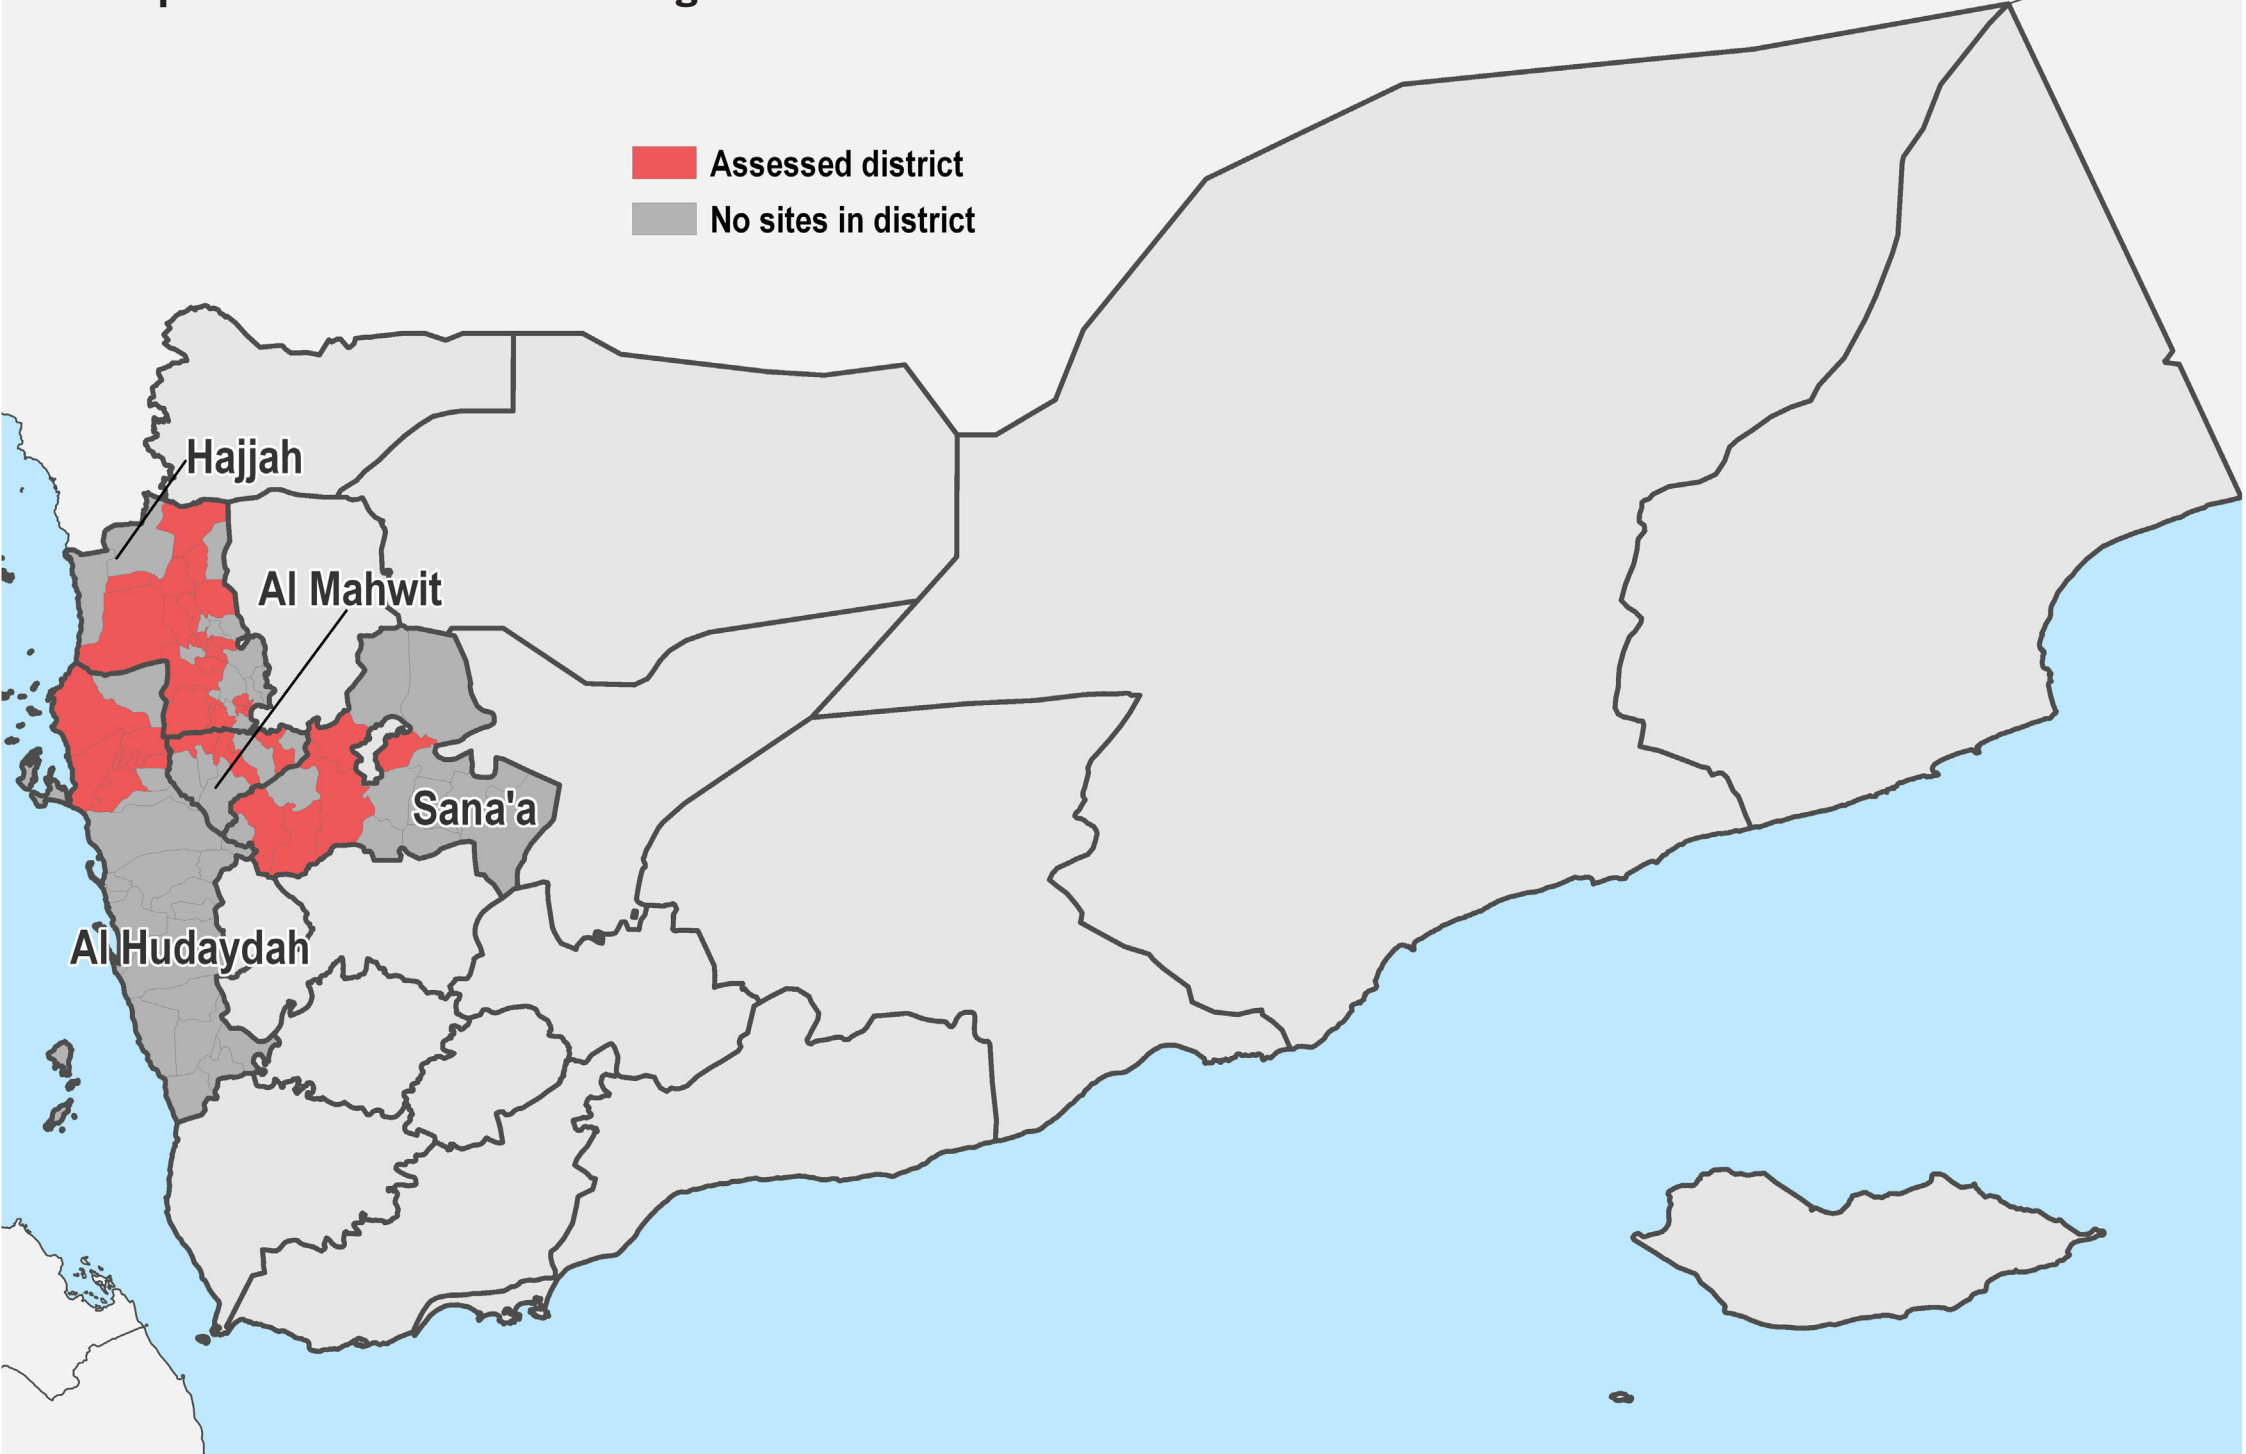

This report uses the following definitions for type and status of shelters present in displacement sites:

- **Make-shift shelter:** typically built from waste and temporary materials (tarpaulins, cardboard, blankets, metal sheeting, tarps, etc.);
- **Emergency shelter:** a portable shelter with a cover and a structure;
- **Finished building:** a building which is completed (with walls and roof) and composite of all building components (windows, doors, plumbing, etc.);
- **Unfinished building:** a building which has more than its frame, but is still missing elements (i.e. doors, windows, lighting, plumbing, walls, etc.);
- **Skeleton:** a building which has a solid frame (concrete, steel, etc.) but no other elements;
- **Open air:** no structure present.

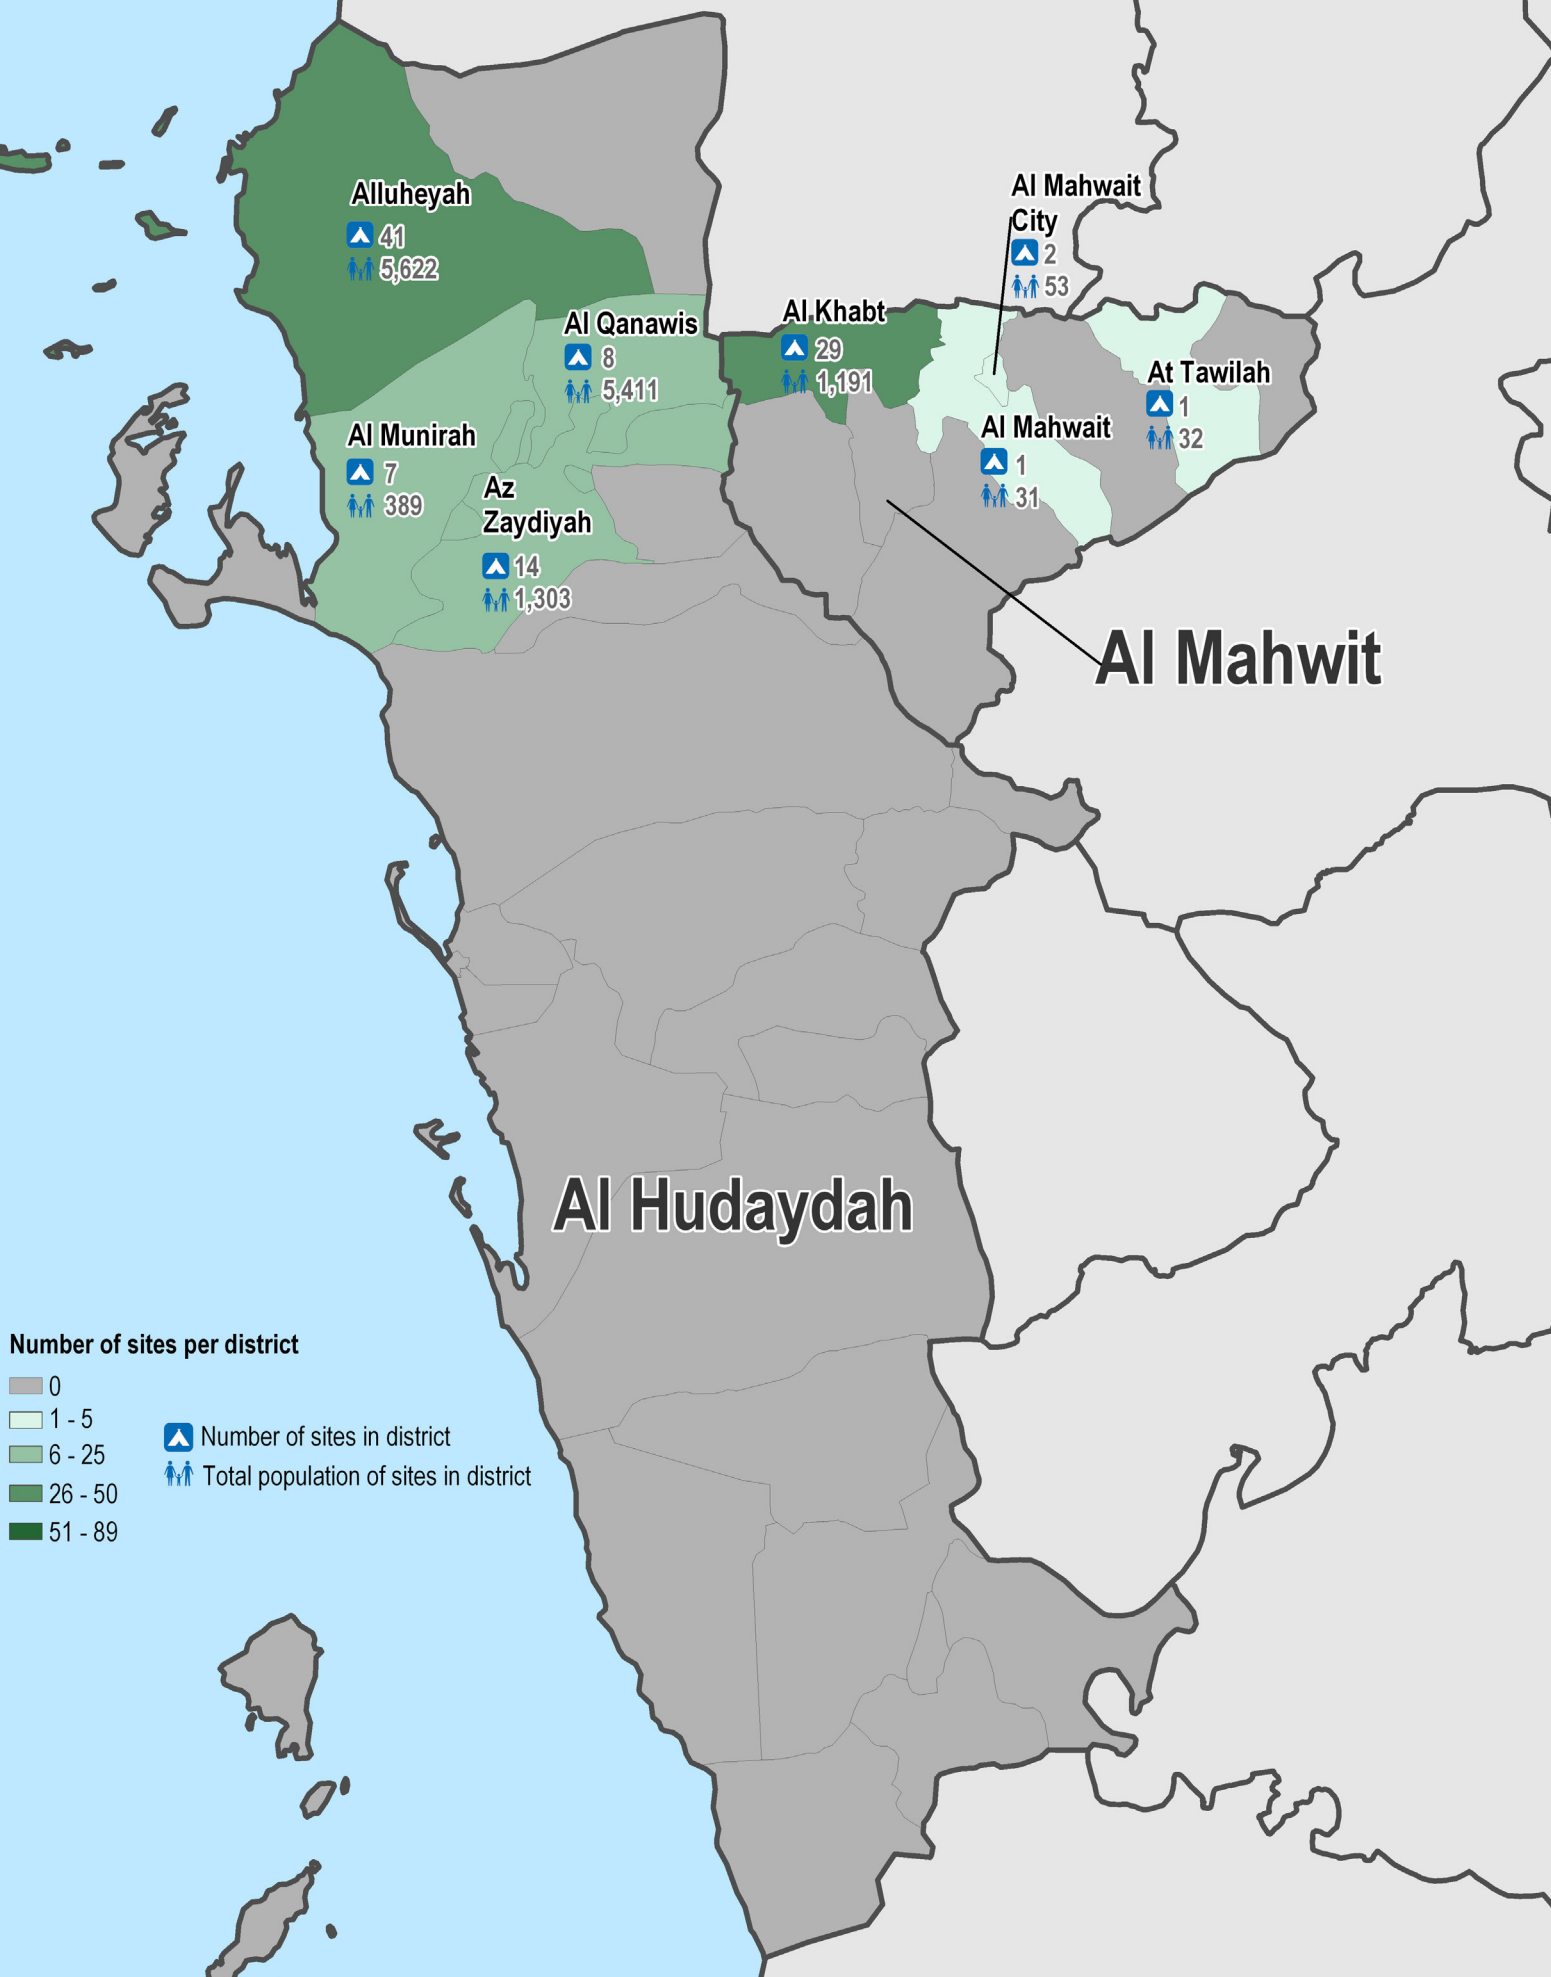

Other definitions:

- **Unhygienic facilities:** Facilities that are not sanitary and do not respect minimum standards of cleanliness or that may cause disease.
- **Functioning facilities:** Facilities that continue to fulfil the purpose for which they were constructed or provided.
- **Private (site, services or facilities):** Site belonging to, controlled by or for the use of one particular person, group of people, or commercial company only and not owned by or connected with the government. Services or facilities provided by a particular person, group of people, or commercial company.
- **Public (site, services or facilities):** Site belonging to, controlled by, or for the use of the entire population rather than a particular individual/group. Services or facilities provided by the government.

IDP Hosting Site Baseline Assessment

Site Profiles

YEMEN: Al Hudaydah, Al Mahwit, Hajjah, Sana'a

JULY, 2018

IDP Hosting Site Profile - Al Hasnyah (الحسنيه)

Al Hasnyah, Al Munirah District, Al Hudaydah Governorate, Yemen

Baseline Assessment, July 2018

Site ID: YE1805-1115

This profile provides an overview of conditions in the IDP Hosting Site Al Hasnyah, Al Munirah district, Al Hudaydah governorate in Yemen. Information presented here was collected from key informant(s) from the site during the IDP Hosting Sites Baseline Assessment organised and supported by the Shelter / NFI / CCCM Cluster coordination team and cluster partners engaged in the activity.

Demographics

Number of individuals:	17			
Number of households:	8			
Male	0%	Over 60	24%	Female
	0%	18 - 60	18%	
	0%	5 - 17	29%	
6%	6%	0 - 4	24%	94%

CCCM

Site type:	Collective center
Site first occupied:	5/1/2015
Site management type:	Private/Voluntary
Site committee established:	Yes
Main source of information for IDPs:	Word of mouth

Shelter/NFI

Proportion of households living in each shelter type:	
Open air:	7%
Emergency shelter:	13%
Makeshift shelter:	25%
Unfinished building:	35%
Finished building:	20%

Issues present in the buildings (finished/unfinished):	
Broken windows/leaking roof:	Yes
Lack of heating:	Yes
Lack of lighting:	No
Presence of vector:	No
Unhygienic washing facilities:	No
Damp:	No
Not secure:	Yes
Not enough space/privacy:	Yes
Type of separation in most family units:	Distinctly separate rooms

Main NFI items needed in the site:	
Plastic sheeting/tarpaulin:	No
Blanket/mattress:	Yes
Water bucket/jerry can:	No
Kitchen utensils:	No
Soap:	Yes
Other:	No

Food Security

A majority of the site residents eat 3 meals a day:	Yes
Food market within 30 min by foot (one way):	Yes

Source(s) of food for residents of the site:	
Purchased by IDPs with personal cash:	No
Home grown:	No
Bartered by IDPs for other goods:	No
Donation from the host community:	No
Distribution by authorities:	Yes
UN or NGO distributions:	Yes
Private sector charity:	No

WASH

Access to water in the site: Everyone/nearly everyone has problems accessing water

Primary water source:	Dug well / spring unprotected
Secondary water source(s):	
Piped water into dwelling:	No
Piped water connected to public tap:	No
Illegal connection to piped network:	No
Connection directly from borehole:	No
Dug well / spring protected:	No
Dug well / spring unprotected:	No
Rainwater tank protected:	No
Rainwater tank unprotected:	No
Water trucking:	No
Bottled water:	Yes
Surface water:	No

Bathing and sanitation facilities:	
Population with access to bathing facilities:	Nobody has access
Total number of showers:	0 (N/A persons per shower)
Population with access to sanitation facilities:	Nobody has access
Total number of latrines:	0 (N/A persons per latrine)

Health

Primary healthcare provider in the site:	
General care:	NGO / UN
Pregnant and lactating women:	Private (IDPs are paying)
Doctor/nurse visiting the site:	No
Outbreak of diarrhoea reported:	Yes

Education

Proportion of boys under 15 getting primary education:	Few
Proportion of girls under 15 getting primary education:	Few
Primary school within 30 min by foot (one way):	Yes

Protection

Tenancy arrangement:	
Site owner:	Owner not known
Type of agreement with the owner:	N/A
Cost of rent:	N/A
Risk of eviction:	No

Risks associated with the site:	
Electrical concerns:	No electricity
Risk of mines, UXOs, ERWs:	No

Presence of vulnerable persons in the site:	
Female heads of household:	2
Elderly heads of household:	2
Unaccompanied or separated children:	0
Pregnant or lactating women/girls:	2
Persons with chronic illness:	3
Persons with physical disability:	2
Persons with mental disability:	2

IDP Hosting Site Profile - Al Qushairi (القشيري)

Al Qushairi, Al Munirah District, Al Hudaydah Governorate, Yemen

Baseline Assessment, July 2018

Site ID: YE1805-797

This profile provides an overview of conditions in the IDP Hosting Site Al Qushairi, Al Munirah district, Al Hudaydah governorate in Yemen. Information presented here was collected from key informant(s) from the site during the IDP Hosting Sites Baseline Assessment organised and supported by the Shelter / NFI / CCCM Cluster coordination team and cluster partners engaged in the activity.

Demographics

Number of individuals:	48			
Number of households:	16			
Male	8%	Over 60	6%	Female
	10%	18 - 60	8%	
	10%	5 - 17	17%	
50%	21%	0 - 4	19%	50%

CCCM

Site type:	Collective center
Site first occupied:	5/1/2015

Kitchen utensils:	No
Soap:	Yes
Other:	No

Food Security

A majority of the site residents eat 3 meals a day:	Yes
Food market within 30 min by foot (one way):	Yes

Source(s) of food for residents of the site:	
Purchased by IDPs with personal cash:	No
Home grown:	No
Bartered by IDPs for other goods:	No
Donation from the host community:	Yes
Distribution by authorities:	Yes
UN or NGO distributions:	Yes
Private sector charity:	No

WASH

Access to water in the site: Sometimes water access is easy, sometimes it is difficult

Primary water source: Piped water connected to a public tap

Secondary water source(s):

Piped water into dwelling:	No
Piped water connected to public tap:	No
Illegal connection to piped network:	No
Connection directly from borehole:	No
Dug well / spring protected:	Yes
Dug well / spring unprotected:	No
Rainwater tank protected:	No
Rainwater tank unprotected:	No
Water trucking:	No
Bottled water:	No
Surface water:	No

Bathing and sanitation facilities:

Population with access to bathing facilities:	Nobody has access
Total number of showers:	0 (N/A persons per shower)
Population with access to sanitation facilities:	Nobody has access
Total number of latrines:	0 (N/A persons per latrine)

Health

Primary healthcare provider in the site:

General care:	Voluntary basis (IDP or host community)
Pregnant and lactating women:	Voluntary basis (IDP or host community)
Doctor/nurse visiting the site:	Yes
Outbreak of diarrhoea reported:	Yes

Education

Proportion of boys under 15 getting primary education:	All/ Nearly all
Proportion of girls under 15 getting primary education:	All/ Nearly all
Primary school within 30 min by foot (one way):	Yes

Protection

Tenancy arrangement:

Site owner:	Owner not known
Type of agreement with the owner:	N/A
Cost of rent:	N/A
Risk of eviction:	No

Risks associated with the site:

Electrical concerns:	Low and uncovered
Risk of mines, UXOs, ERWs:	No

Presence of vulnerable persons in the site:

Female heads of household:	1
Elderly heads of household:	2
Unaccompanied or separated children:	2
Pregnant or lactating women/girls:	4
Persons with chronic illness:	3
Persons with physical disability:	2
Persons with mental disability:	1

Lack of heating:	No
Lack of lighting:	No
Presence of vector:	No
Unhygienic washing facilities:	No
Damp:	No
Not secure:	No
Not enough space/privacy:	No
Type of separation in most family units:	Not separated

Main NFI items needed in the site:

Plastic sheeting/tarpaulin:	Yes
Blanket/mattress:	Yes
Water bucket/jerry can:	No
Kitchen utensils:	No
Soap:	No
Other:	No

Food Security

A majority of the site residents eat 3 meals a day:	No
Food market within 30 min by foot (one way):	Yes

Source(s) of food for residents of the site:

Purchased by IDPs with personal cash:	No
Home grown:	Yes
Bartered by IDPs for other goods:	No
Donation from the host community:	No
Distribution by authorities:	No
UN or NGO distributions:	Yes
Private sector charity:	No

WASH

Access to water in the site: There is enough water for hosts, but not for IDPs

Primary water source: Piped water into dwelling

Secondary water source(s):

Piped water into dwelling:	No
Piped water connected to public tap:	Yes
Illegal connection to piped network:	No
Connection directly from borehole:	No
Dug well / spring protected:	No
Dug well / spring unprotected:	No
Rainwater tank protected:	No
Rainwater tank unprotected:	No
Water trucking:	No
Bottled water:	No
Surface water:	No

Bathing and sanitation facilities:

Population with access to bathing facilities:	About half (±50%)
Total number of showers:	35 (11 persons per shower)
Population with access to sanitation facilities:	Minority (±15-30%)
Total number of latrines:	15 (25 persons per latrine)

Health

Primary healthcare provider in the site:

General care:	NGO / UN
Pregnant and lactating women:	NGO / UN
Doctor/nurse visiting the site:	No
Outbreak of diarrhoea reported:	Yes

Education

Proportion of boys under 15 getting primary education:	Majority
Proportion of girls under 15 getting primary education:	Few
Primary school within 30 min by foot (one way):	Yes

Protection

Tenancy arrangement:

Site owner:	Private
Type of agreement with the owner:	N/A
Cost of rent:	N/A
Risk of eviction:	Yes, oral notice of eviction

Risks associated with the site:

Electrical concerns:	No electricity
Risk of mines, UXOs, ERWs:	No

Presence of vulnerable persons in the site:

Female heads of household:	6
Elderly heads of household:	5
Unaccompanied or separated children:	0
Pregnant or lactating women/girls:	25
Persons with chronic illness:	18
Persons with physical disability:	1
Persons with mental disability:	5

IDP Hosting Site Profile - Labadah (لبادة)

Al Badah, Abs District, Hajjah Governorate, Yemen

Baseline Assessment, July 2018

Site ID: YE1704-1075

Plastic sheeting/tarpaulin:	Yes
Blanket/mattress:	Yes
Water bucket/jerry can:	No
Kitchen utensils:	No
Soap:	No
Other:	No

Food Security

A majority of the site residents eat 3 meals a day:	Yes
Food market within 30 min by foot (one way):	Yes

Source(s) of food for residents of the site:	
Purchased by IDPs with personal cash:	No
Home grown:	Yes
Bartered by IDPs for other goods:	No
Donation from the host community:	No
Distribution by authorities:	No
UN or NGO distributions:	No
Private sector charity:	No

WASH

Access to water in the site: There is enough water for hosts, but not for IDPs

Primary water source:	Dug well / spring unprotected
Secondary water source(s):	
Piped water into dwelling:	No
Piped water connected to public tap:	No
Illegal connection to piped network:	No
Connection directly from borehole:	No
Dug well / spring protected:	No
Dug well / spring unprotected:	No
Rainwater tank protected:	No
Rainwater tank unprotected:	No
Water trucking:	No
Bottled water:	No
Surface water:	No

Bathing and sanitation facilities:	
Population with access to bathing facilities:	Minority (±15-30%)
Total number of showers:	26 (35 persons per shower)
Population with access to sanitation facilities:	Nobody has access
Total number of latrines:	0 (N/A persons per latrine)

Health

Primary healthcare provider in the site:	
General care:	Private (IDPs are paying)
Pregnant and lactating women:	Private (IDPs are paying)
Doctor/nurse visiting the site:	Yes
Outbreak of diarrhoea reported:	Yes

Education

Proportion of boys under 15 getting primary education:	Few
Proportion of girls under 15 getting primary education:	Few
Primary school within 30 min by foot (one way):	Yes

Protection

Tenancy arrangement:	
Site owner:	Public
Type of agreement with the owner:	Oral without local witnesses
Cost of rent:	No rent payment
Risk of eviction:	No

Risks associated with the site:	
Electrical concerns:	No electricity
Risk of mines, UXOs, ERWs:	Yes

Presence of vulnerable persons in the site:	
Female heads of household:	10
Elderly heads of household:	20
Unaccompanied or separated children:	6
Pregnant or lactating women/girls:	11
Persons with chronic illness:	15
Persons with physical disability:	13
Persons with mental disability:	7

IDP Hosting Site Profile - Al Hudhn (الحضن)

Al Mesyal, Washhah District, Hajjah Governorate, Yemen

Baseline Assessment, July 2018

Site ID: YE1730-850

This profile provides an overview of conditions in the IDP Hosting Site Al Hudhn, Washhah district, Hajjah governorate in Yemen. Information presented here was collected from key informant(s) from the site during the IDP Hosting Sites Baseline Assessment organised and supported by the Shelter / NFI / CCCM Cluster coordination team and cluster partners engaged in the activity.
