- District Boundary

In January 2019, OCHA conducted focus group discussions (FGDs) with humanitarian actors in all five humanitarian hubs to determine the access conditions in 333 districts in Yemen. Separate discussions were held with UN agencies, international NGOs and national NGOs, with 18-24 participants attending in each hub. All districts were scored on a three-point severity scale, ranging from 'accessible/low access constraints' to 'medium constraints' to 'high access constraints'. Please note, this map reflects the average score from the three FGDs conducted in the hub.

The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.
